João Pedro de Souza Coutinho

iOS Engineering Manager

Porto Alegre, Rio Grande do Sul, Brazil

Summary

I graduated from the Universidade Federal do Rio Grande do Sul with a Bachelor Degree in Computer Engineering.

My professional experience started in 2017 with web development (PHP + JavaScript and Java). Few months later I had the opportunity to join the mobile team to work with Android (Java) and iOS (Obj-C and Swift). Working with mobile development was always my dream, and after 1 year interchanging between stacks I decided to focus my career on iOS Development.

During this journey I've worked with many different clients from different areas such as Healthcare, Retailment, Shopping, Real Estate, Banking and Entertainment.
